

MEALS ON WHEELS

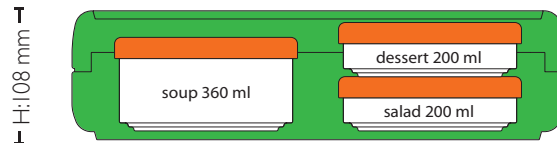

MONDO BASIC is the green, inexpensive entry into the MONDO world. MONDO BASIC enables an appealing packaging and safe delivery of a basic menu with 3-4 components and simultaneously complies with valid Food Hygiene Regulations. However, the BASIC system still allows you to benefit from a large variety of technical advantages known from its "big brothers" MONDO and JUMBO. A later changeover to the bigger systems is easily possible. The versions depicted here contain the following system components:

 **New! Box also available in yellow!**

- ② MONDO BASIC Box, 2 sect. oval porcelain plate with silicon lid, 2 porcelain side bowls 200 ml and 1 porcelain side bowl 360 ml with silicon lids.

- ① 2 x 300 ml bowl

- ② 2 x 200 ml, 1 x 360 ml bowl

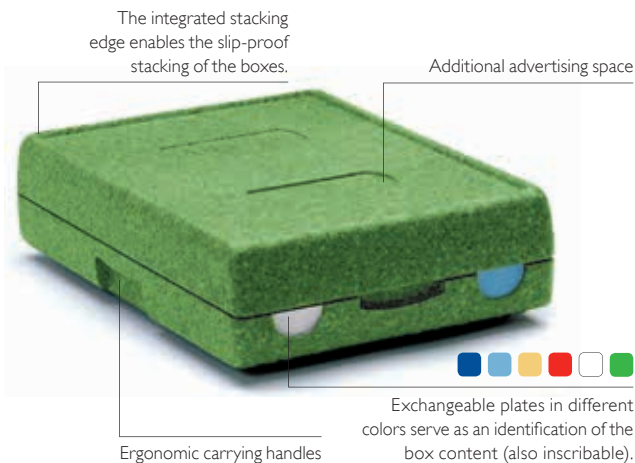

MONDO BASIC

NEW

MONDO BASIC

MONDO BASIC enables an economically priced entry in order to perfectly package a menu consisting of a main dish, soup, salad, and dessert. During transport, both the main dish and the soup maintain a temperature of over 65°C for a period of up to 2 hours. For the delivery of salads and desserts, the cooling lid BLUEMAX can optionally be employed. It ensures temperatures below 10°C and even enables the delivery of ice-cream during summer time.

The MONDO BASIC lid

One-hand handling

New! Box also available in yellow!

THE THERMOBOX

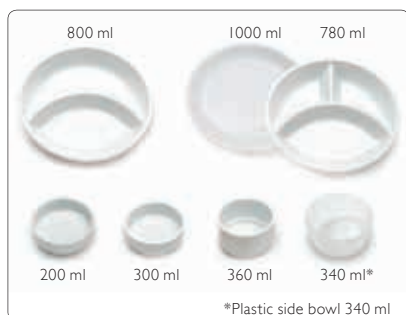

- HACCP compliant

- Thermal zones +65°C/+149°F and +10°C/+50°F
- Salad dressing compartment
- Long service life

PORCELAIN AND LIDS

...made in Germany

HIGH-TECH PORCELAIN

- Shaping, processing and material result in a higher breaking resistance of 30% in comparison with ordinary porcelain.
- The shape as well as the steep edge of the plates ease the independent food consumption of single-hand eaters with a spoon or fork.
- Barriers in both the plate and the lid prevent food components from mixing together during transport.

The MONDO BASIC product range

DINNER-MAX TABLEWARE LIDS

- Silicon lids for main dish plate and side bowls
- Single-hand handling; suitable for physically challenged people
- Attested food compatibility
- 100% leak-proof, lifelong
- Easy opening and closing
- Dishwasher-proof and color stable
- Temperature resistance up to 200°C/392°F
- Suitable for all regeneration processes
- Microwaveable
- The surrounding sealing lip makes the vessels 100% leak-proof during transport. An additional sealing lip separates the main dish compartment from the side dish compartments.

The BLUEMAX cooling lid

DINNER-MAX LOGISTICS

SHELF TROLLEY | OP 2032

- Chassis:**
4 castors, stainless, 2 lockable, Ø 125 mm
